🚀 Development Roadmap

🟢 Phase 1: Quick UI & Content Fixes (Easy)

- Change home page image + logo

- Fix About Us page

- Add href links in footer (social media links)

- Add content + frame motion animations on all pages

- Build Services page (expandable service cards)

- Ensure all pages responsiveness

🟡 Phase 2: Contact & Basic Integrations (Moderate)

- Contact page: Gmail SMTP integration

- Add Captchas on Contact page form & Infozone form

- Testing SMTP proxy mail behaviour

🟠 Phase 3: Database + Authentication Setup (Moderate to Hard)

- Integrate MongoDB (with server.js if CORS issues)

- Create Admin role schema + CRUD

- Setup Admin protected route access

- Build Admin login page (/admin)

- Develop Login backend CRUD

- Implement Forgot password API with SMTP mail

🔴 Phase 4: Admin Dashboard + Features (Hard)

Admin Dashboard

- Admin Dashboard UI (Infozone + Blog management sections)

InfoZone

- Search bar to search PDFs by name (API + frontend component)

- Upload PDFs + CRUD as admin

- Fetch PDFs from MongoDB via API (/infozone/page.js)

Blogs

- CRUD blogs as admin

- Get all blogs API

- List + Expand blog view
